

23) Write a program to demonstrate multiple interfaces.

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Text;

namespace Ass23
{
    public interface demo
    {
        void method1();
    }

    public interface demo1
    {
        void method2();
    }

    class demo3 : demo, demo1
    {
        public void method1()
        {
            Console.WriteLine("first interface ");
        }
        public void method2()
        {
            Console.WriteLine("second interface");
        }
    }
    class Program
    {
        static void Main(string[] args)
        {
            demo3 d = new demo3();
            d.method1();
            d.method2();
            Console.ReadLine();
        }
    }
}
```
