

30) Write C#.net code to create login form.

```
using System;
using System.Collections.Generic;
using System.ComponentModel;
using System.Data;
using System.Drawing;
using System.Linq;
using System.Text;
using System.Windows.Forms;

namespace Ass30
{
    public partial class Form1 : Form
    {
        public Form1()
        {
            InitializeComponent();
        }

        private void button1_Click(object sender, EventArgs e)
        {
            if (textBox1.Text == "rcp" && textBox2.Text == "imrd")
            {
                MessageBox.Show("Login Successfully");
            }
            else
            {
                MessageBox.Show("Username And Password incorrect");
            }
        }
    }
}
```

Step 1 : Create a form

Step 2 : Write code for login button
